

Application No.: 10/824,266

Docket No.: JCLA12868

REMARKS**Present Status of the Application**

Applicants appreciate that all pending claims 1-14 have been allowed.

Applicants have amended claims 1-3, 5, 7-11 and 13 since Applicants consider that the type of the substrate of the first element in original claims 1 and 7 defined as "a second type" is not a proper description under the logic consideration. Correction of the term "a second type" and "a first type" in original claims to "a first type" and "a second type", respectively, is more adequate. In claims, only two reference types (first and second) are referred. Therefore, after amendment, the scope of amended claims remains the same and no new issue is raised.

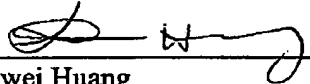

Applicants believe that this amendment does not affect the consideration of patentability and should be entered.

CONCLUSION

For at least the foregoing reasons, it is believed that all the pending claims 1-14 are in proper condition for allowance.

Respectfully submitted,
J.C. PATENTS
